SEPTEMBER 2018

Embargo: 00:01hrs 1 October 2018

SENTIMENT SLUMPS AS GROWTH EXPECTATIONS STALL

Optimism among financial services firms fell sharply in the quarter to September, while total business volumes rose only moderately, reflecting a mixed performance across sectors. Building societies, finance houses and insurers reported rising demand for their services, while volumes were stable in banking and fell in investment management. Profits in the financial services sector as a whole were unchanged for a second successive quarter, with a similarly mixed picture across sectors. Looking ahead, expectations have generally softened since June. For the first time since 2009, firms expect no improvement in overall business volumes over the quarter ahead. Total employment is expected to remain stable in the three months to December, with banks and investment managers planning to reduce headcount. Firms' investment intentions for the year ahead have also cooled somewhat, though spending IT is still tipped to grow at a historically strong pace.

Mixed fortunes across sub-sectors

Optimism about the overall business situation in financial services fell further in the quarter to September, having declined in all but one quarter since the start of 2016. The deterioration of sentiment in banking and investment management was particularly widespread, while only finance houses reported an improvement in optimism.

Overall business volumes increased slightly in the three months to September, although the level of business dipped slightly below normal. However, conditions varied across the financial services sector. Whilst most sub-sectors reported rising business volumes—notably in insurance—activity in banking was stable for a second successive quarter and investment managers reported that volumes contracted, confirming a striking loss of momentum in the sector during 2018. Overall business volumes are expected to be stable over the quarter ahead.

Amid weak volumes growth and rising costs, profits in the sector as a whole were flat in the quarter to September, for a second successive quarter. Several sub-sectors saw profits fall, with investment managers reporting the steepest drop since the financial crisis. Overall profitability is expected to improve in the three months ahead, but to continuing declining in investment management.

Skills shortages at a record high

Investment intentions for the year ahead cooled over the three months to September. Financial services firms plan to raise spending on marketing and IT, but they expect to cut back on capital spending in other areas. Respondents reported that investment spending would be motivated by a broad range of factors, with citations for regulatory compliance, efficiency & replacement, capacity expansion and the provision of new services all above average.

Almost half of firms said skill shortages could constrain business expansion in the year ahead—the highest share since the start of the survey in 1989. Three quarters of firms anticipated difficulties recruiting IT workers in the year ahead, while around one third expected skills

shortages in compliance/audit and risk management/actuarial/claims. In response to recruitment difficulties, one quarter of firms are looking to shift how they advertise jobs, while a similar number will look to invest in artificial intelligence and automation.

CONTENTS

PAGE 2 SUPPLEMENTARY QUESTIONS

On recruitment strategies; skills shortages by roles; and the main influences on employment plans over the year ahead.

PAGE 5 BANKS

Sentiment fell sharply. Business volumes were flat and are expected fall next quarter.

PAGE 7 BUILDING SOCIETIES

Sentiment was unchanged. Business volumes rose, but are expected to fall next quarter.

PAGE 9 FINANCE HOUSES

Optimism and volumes growth improved for a second successive quarter, but no growth is expected.

PAGE 11 LIFE INSURANCE

Sentiment deteriorated. Volumes rose but are expected to contract next quarter.

PAGE 13 GENERAL INSURANCE

Sentiment was unchanged. Volumes edged up and growth is tipped to accelerate next quarter.

PAGE 15 INSURANCE BROKERS

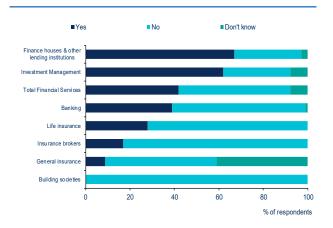

Sentiment was stable. Volumes improved and are tipped to rise at a similarly strong pace next quarter.

PAGE 17 INVESTMENT MANAGEMENT

Optimism deteriorated sharply. Business volumes fell for the first time in three years, with modest growth expected next quarter.

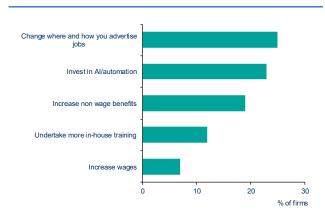

SUPPLEMENTARY QUESTIONS

Difficulties recruiting/retaining workers over past year

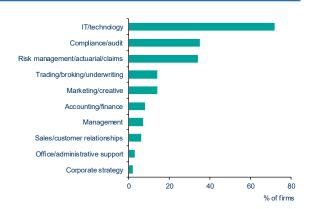

Overall, 42% of financial services firms reported that they had found it more difficult to recruit or retain workers over the past year, while 50% of firms said they had not. The greatest difficulties in recruiting/retaining workers were reported by finance houses & other lending institutions (67%) and investment managers (62%). One in four banks (39%) said they had found it more difficult to recruit/retain workers, while insurance firms and building societies appeared to be relatively unaffected.

Responses to recruitment/retention challenge

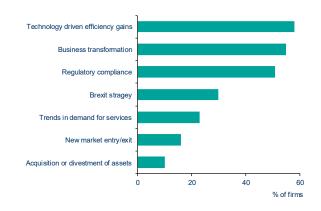

In response to difficulties recruiting/retaining workers, around one quarter of firms said they would change where and how they advertise. However, significant numbers also foresee more strategic responses to skills shortages, such as investing in artificial intelligence or automation (23%), increasing non-wage benefits (19%) or undertaking more in -house training (12%).

Expected skills shortages over the year ahead

Almost three-quarters of firms (72%) expect problems recruiting IT workers in the year ahead. This was the number one concern for life insurers (100%), investment managers (90%), finance houses (74%) and banks (73%). Building societies were marginally more concerned about difficulties recruiting risk managers (67%), while general insurers foresaw difficulties recruiting traders/brokers/ underwriters (49%). Insurance brokers cited shortages of sales and customer relationship staff (72%) as their main concern.

Factors affecting headcount over the year ahead

Overall, technology-driven efficiency gains (58%), business transformation (55%) and regulation (51%) are expected to be the most important factors driving changes in headcount over the year ahead. Only 23% of financial services firms said that demand for services would be important in driving changes to headcount, including half of general insurers, but just 2% of banks.

FURTHER INFORMATION

Economic intelligence

The CBI economic intelligence team takes advantage of the CBI's diverse contacts with British business to build up an accurate assessment of the latest developments in the UK and international economy. Widely acknowledged for their professional standards, the teams' work is vital since government statistics, where available, are often slow to be published and are subject to revision. Apart from the quarterly UK economic outlook and International business outlook, the teams publish the unique CBI business surveys, covering manufacturing, distribution, consumer, business & professional services, financial services and SMEs. All results are carefully scrutinised and discussed by business people and economists before publication.

ADVISING FINANCIAL SERVICES ORGANISATIONS

PwC LLP is proud to support the financial services industry through our involvement with the CBI/PwC Financial Services Survey. No other survey so comprehensively and immediately identifies the current perceptions held by the industry and its plans for investment, human resources, marketing and other strategic developments.

PwC firms provide industry-focused assurance, tax and advisory services to enhance value for their clients. More than 169,000 people in 158 countries in firms across the PwC network share their thinking, experience and solutions to develop fresh perspectives and practical advice. See www.pwc.com for more information.

THE CBI/PWC FINANCIAL SERVICES SURVEY

This survey was launched in December 1989 and draws on the CBI's considerable expertise in survey analysis. It is one of the CBI's regular business trends surveys, standing together with the long established Industrial Trends Survey, the more recent Distributive Trades Survey and the survey of Consumer, Business and Professional Services launched in 1998.

The survey covers a broad range of financial services activities, including banks, finance houses, securities traders, fund managers and the insurance industry. It offers a unique and up-to-date insight into the recent trends and future prospects for these industries.

Modelled on the CBI's Industrial Trends Survey, the survey is based on a qualitative rather than quantitative approach. Firms are asked a number of questions, covering: the trend for the past three months in the value and volume of business, charges, costs, profits, employment and training; the expected trend in these indicators over the next three months; factors likely to limit the ability to expand business over the year ahead; whether firms have become more or less optimistic about the situation in their sector; whether they regard the level of business as above or below 'normal'; investment intentions over the coming year; the reasons for such planned expenditure; and the likely constraints on it.

The survey responses are weighted according to the size of the company and the importance of its activity within the industry. Responses are treated in absolute confidence, with replies being made anonymously where desired.

The survey results are reported in a similar way to other CBI surveys and often use the 'balance' statistic – the difference between the percentage of respondents replying 'more', 'above normal' or 'up' minus the percentage replying 'less', 'below normal', or 'down'. The 'balance' provides a simplified method of interpreting the results and over a period of time the trend in the balance gives a good indication of the trend in the economic indicator.
